

By the **1<sup>st</sup> of March 2012** (or by arrangement) the **Division Public and Organizational Health** of the Institute of Social and Preventive Medicine, (University of Zurich) and the Center for Organizational and Occupational Sciences (ETH Zurich) is offering a

## **PhD position Health@Work (3 years)**

The PhD project „**Effectiveness study of individual and organizational stress management interventions at work**“ supported by the Swiss National Science Foundation (SNF) is based on a large-scale, longitudinal organizational intervention study, which has been finished by the end of last year. Besides the paper-based dissertation, the PhD candidate will be part of the PhD program Health@Work, supported by the SNF, offering various courses in the field.

### **Tasks:**

- Support of the conceptualization, implementation and analysis of ongoing projects
- Data collection, analysis and interpretation
- Literature search
- Writing scientific publications, conference contributions
- Support of the development and conduction of teaching courses

### **Requirements:**

- Masters degree in social sciences, preferred (Work & Organizational-, Applied-, Health-) Psychology or Economics
- Pronounced interest and ideally basic knowledge in the field of work and health
- Experiences in planning and implementing empirical research (and publishing)
- Knowledge of quantitative research methods, especially of longitudinal data analysis
- Proficient English language skills
- Team spirit
- Initiative, independence, flexibility

### **We offer:**

- Broad insight in an applied research field
- Integration in an engaged, interdisciplinary research team

We are looking forward to your application.

Please send your application to PD Dr.med. DrPH Georg Bauer, **dfuellemann@ethz.ch** until the **19<sup>th</sup> of february 2012**.
